دي فوسفات الكالسيوم-الترا®

# dcp-ultra

Di-Calcium Phosphate

**Contents Range**
**Calcium --- 28-30%**
**Phosphate(P2O5) --- 17-19%**

## Description

In general, poultry and livestock animals receive less phosphorus than they should. This is because the phosphorus content in vegetable feeds reaches only 30% of what is essentially needed, and even then, only half is absorbed. Farm animals with a diet that is deficient in calcium and phosphorus often suffer from the following health problems:

- Restricted growth
- Deterioration of appetite
- Disruption of the bone mineralization process
- Decreased productivity, followed by reduced consumption and digestion of feed; digestive disorders, moulting, and hair loss
- A slowdown or complete cessation of growth

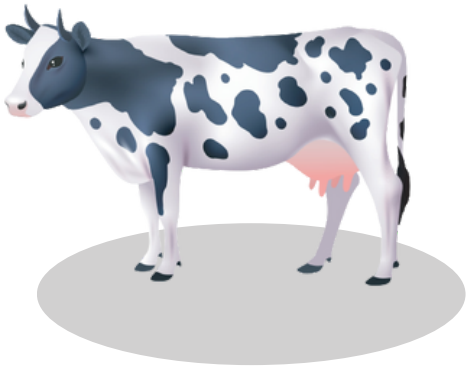

An indispensable source of prevention for these problems can be found in inorganic phosphates. These are used as a supplement to organic feeds to obtain the required level of P-content for optimal production and mineralization of bones.

## Benefits

*Improves milk production (approx. 1.4 g of phosphorus required/litre of milk production)*

*Improves the conception rate in dairy cows.*

*Helps in nerve impulse transmission, heart regulation, milk secretion, and hormone secretion, and also strengthens the immune system.*

*Calcium aids in bone formation and maintenance, tooth development and maintenance, blood clotting, membrane permeability, and muscle contraction (approximately 1.6-2 g of calcium is required per 1 litre of milk produced).*

*Improves digestion by increasing the activity of digestive enzymes and the efficiency of carbohydrate, protein, fat, mineral, and energy metabolism in the body.*

*Neutralizes the harmful effects of several elements; sodium, potassium, magnesium, and others.*

## Dosage Instructions

**For Cows & Buffs:** 70-100 g/day
**For Poultry:** 1-1.5 kg/ton of feed

- *By inclusion in TMR or top feed of cattle and buffalo*
- *Dose rate varies depending upon the animal's stage, age and feed formulation for the animals*

***Odour:*** *Odourless*
***Solubility:*** *Insoluble*
***Packaging: 25 Kg Bag***
***Safety measures:*** *Avoid contact with skin and eyes. Avoid dust inhalation. Always check the information on the material safety data sheet*
***Storage:*** *Cool and dry Shelf life: At least 24 months from date of production*
