جلوكوزا® glucosa (Liquid)

Iconic Glucose Precursor

Glucosa® is a mix of glucose precursors and ultra high-performance ingredients. Its highly concentrated formula maintains optimal levels of glucose in diary cows and small ruminants. Glucosa, an iconic product from Nutrichè, provides cows with the glucose they need but unfortunately are often lacking.

Ingredients

Propylene Glycol, Glycerin, Sorbitol, Vit B12, Glucose Pre-Cursors & Water.

Magical Boosting Product

Glucosa® has real added value compared to your basic glucose precursors. Our product is a mix of precursors that, when blended, have an extremely effective synergistic effect. What are the advantages of glucose precursors compared to sugars? Sugars feed bacteria in the rumen and are not glycogenic. Glucose precursors feed the cow and are converted into glucose in the liver. Glucosa® also contains specific vitamins with targeted actions to ensure healthy functioning rumen flora and to rid the body of ketones.

Ketosis, the No. 1 problem in early lactation

Ketosis (acetonemia) is the number one problem in early lactation. 40% of cows on farms are affected by this disorder. During the last weeks of gestation and the first months of lactation, the energy demands of dairy cows is so high that it results systematically in a negative energy balance. To mitigate such deficiencies, the primary objective is to raise blood glucose levels because if they are too low, consequences can be dire

Dosage Instructions

3 weeks before calving: 150-250ml/cow/day.
3 weeks after calving: 200-300ml/cow/day.
Treatment Dose: 300-400 ml/cow/day.

Odour: *Odourless*
Packaging: *25 Kg Can & 237 Kg Poly Drum*
Safety measures: *Avoid contact with skin and eyes. Avoid dust inhalation. Always check the information on the material safety data sheet.*
Storage: *Cool and dry*
Shelf life: *At least 24 months from date of production*
