نوتريمين-جولد®
nutrimin-gold

High Potency Minerals Supplement

Nutrimin Gold® is a specially formulated blend of essential minerals designed to support the overall health and productivity of your herd.
Our premix includes a balanced combination of minerals such as calcium, phosphorus, magnesium, and potassium, which are necessary for healthy bone development, muscle function, and nerve activity. It also contains essential trace minerals like zinc, copper, and selenium, which are critical for immune system function, reproductive health, and growth.
Our mineral premix is easy to use and can be added directly to your animals' feed or mixed with other supplements. It is manufactured using high-quality ingredients and is free from harmful additives or preservatives. Trust our mineral premix to support the optimal health and productivity of your dairy animals.

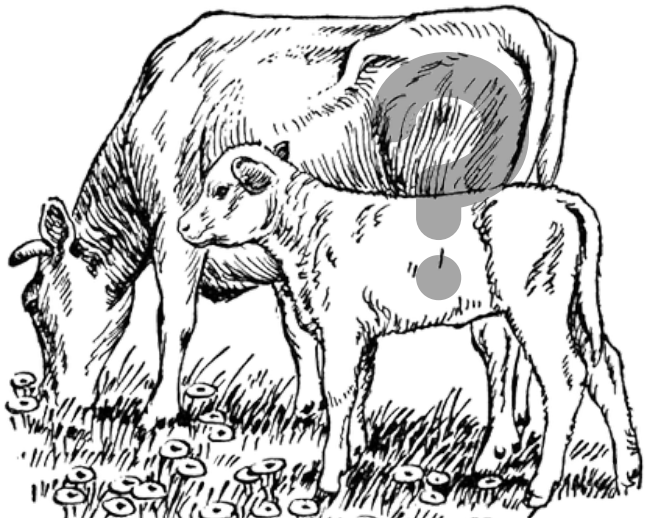

How are Minerals Beneficial for Dairy Animals?

1. Calcium: Calcium is essential for strong bone and teeth development in dairy animals. It also helps in proper muscle function, blood clotting, and nerve activity.
2. Phosphorus: Phosphorus works together with calcium to support bone development, muscle function, and energy metabolism in dairy animals.
3. Magnesium: Magnesium is crucial for proper muscle and nerve function, energy metabolism, and bone development in dairy animals.
4. Potassium: Potassium is important for maintaining the proper balance of fluids and electrolytes in the body. It also supports proper muscle and nerve function.
5. Zinc: Zinc plays a key role in immune system function, wound healing, and reproductive health in dairy animals.
6. Copper: Copper is important for energy metabolism, iron utilization, and immune system function in dairy animals.
7. Selenium: Selenium is essential for immune system function and reproductive health in dairy animals. It also helps to prevent oxidative damage to cells.
8. Manganese: Manganese is important for bone development, energy metabolism, and reproductive health in dairy animals.
9. Iron: Iron is necessary for the production of red blood cells, which carry oxygen throughout the body. It also supports immune system function.
10. Iodine: Iodine is important for proper thyroid function, which regulates metabolism and growth in dairy animals.

In conclusion, minerals play a critical role in maintaining the health and productivity of dairy animals. A balanced mineral premix can ensure that your herd receives all the necessary nutrients to support their growth, development, and overall well-being.

Composition Per Kg

- Calcium --- 250 gm
- Phosphate(PO4) --- 150 gm
- Magnesium --- 45,000 mg
- Sodium --- 45,000 mg
- Ferrous --- 5,000 mg
- Zinc --- 3,500 mg
- Manganese --- 3,000 mg
- Copper --- 2,000 mg
- Cobalt --- 20 mg
- Selenium --- 2,000 mg
- Iodine --- 50 mg
- Sodium Bicarbonate --- 1,000 mg
- Excipients --- Q.S

Dosage Instructions

- *Cows/Buffaloes --- 75-100 grams/Day*
- *Dry Animals --- 40-50 grams/Day*
- *Calves/Goat --- 15-20 grams/Day*

Odour: *Odourless*
Packaging: *25 Kg Paper Bag*
Safety measures: *Avoid contact with skin and eyes. Avoid dust inhalation. Always check the information on the material safety data sheet.*
Storage: *Cool and dry*
Shelf life: *At least 24 months from date of production*
