NUTRICHÈ AUGMENTUM®

Growth Promoter

Composition

Vitamin A ---- 800,000 IU
Vitamin D3 ---- 2,000,000 IU
Vitamin E ---- 5,000 IU
Vitamin C ---- 10,000 mg
Vitamin K3 ---- 1,000 mg
Vitamin B1 ---- 3,000 mg
Vitamin B2 ---- 5,000 mg
Vitamin B12 ---- 500 mg
Biotin ---- 10 mg
Folic Acid ---- 100 mg
Calcium Pantothenate ---- 5,000 mg
Nicotinamide ---- 5,000 mg
DL-Methionine ---- 20,000 mg
L-Lysine ---- 30,000 mg
Choline Bitartrate ---- 30,000 mg
Sodium Sulphate ---- 20,000 mg
Potassium Sulphate ---- 50 mg
Magnesium Sulphate ---- 20,000 mg
Zinc Sulphate ---- 20,000 mg
Ferrous Sulphate ---- 15,000 mg

DOSAGE & ADMINISTRATIONS

Regular Use : 1 ml/10 lit of drinking water, once a week
During Stress Condition : 1 ml/4 lit of drinking water, for 3-4 days

Shake well before use.
Medicated drinking water should be used within 24 hours.

Available SKU's

1 Liter Bottle (12 bottles per carton)
5 Liter Can (4 cans per carton)

Storage Conditions

Store in a cool, dry place below 30°C
Protect from direct sunlight and moisture
Keep tightly closed in original container
Keep out of reach of children and unauthorized personnel

Description

Nutrichè Augmentum is a high-potency liquid supplement formulated to promote optimum growth, metabolic performance, and resilience in poultry by combining a broad spectrum of multivitamins, essential amino acids, and electrolytes. With elevated levels of Vitamin D3 (2,000,000 IU) for calcium metabolism, Vitamin E and C for antioxidant protection, and a full range of B-complex vitamins for energy and neurological function, Nutrichè Augmentum effectively boosts growth and feed efficiency. The inclusion of key amino acids such as DL-Methionine (20,000 mg) and L-Lysine (30,000 mg) supports protein synthesis, muscle development, and recovery during periods of stress or disease. Enhanced with Choline Bitartrate, Zinc, Iron, and Magnesium Sulphate, it ensures strong immunity, liver function, and improved hematopoiesis. Nutrichè Augmentum is ideal for use during heat stress, vaccination, post-antibiotic recovery, or any phase requiring enhanced performance, making it a reliable solution to optimize FCR, weight gain, egg production, and overall flock health.

Indications

Enhances growth performance and feed conversion ratio (FCR) by supporting efficient protein metabolism, tissue development, and amino acid utilization during rapid growth phases in broilers.
Improves resistance against disease and oxidative stress by supplying high concentrations of antioxidant vitamins (E, C) and essential trace minerals (Zinc, Iron, Magnesium) that strengthen immune cell function and mucosal barriers.
Aids in the prevention and correction of vitamin and mineral deficiencies, particularly under conditions of heat stress, poor nutrient absorption, or high metabolic demand.
Supports recovery during and after vaccinations, antibiotic treatments, and enteric disorders, helping to stabilize the physiological condition and restore performance levels.
Boosts reproductive performance in breeders by enhancing fertility, hatchability, and egg production through balanced B-complex vitamins, Vitamin D3, and choline.
Alleviates stress-related performance drops associated with transportation, feed change, overcrowding, and environmental challenges by stabilizing electrolyte balance and energy metabolism.
Maintains liver function and metabolic detoxification, particularly in high-protein feeding systems, through the synergistic action of Methionine, Choline, and B-complex vitamins.
