رينوبيون - ١٠٠

RENOBIONE-100®

LIVERTONIC

Description

Renobione-100 is a high-efficacy liver tonic formulated to support hepatic detoxification, metabolic recovery, and performance optimization in poultry and livestock. Enriched with a potent combination of Silymarin (4%), Choline Chloride (100,000 mg), Sorbitol (200,000 mg), and essential co-factors like Vitamin E, Vitamin C, DL-Methionine, and Biotin, Hepagen Plus works synergistically to protect hepatocytes from oxidative stress, promote bile secretion, and accelerate liver cell regeneration. Silymarin, a well-established hepatoprotective phytochemical, stabilizes liver membranes and neutralizes toxins, while Choline and Inositol prevent hepatic lipidosis and enhance fat metabolism. The high inclusion of Sorbitol acts as an osmotic liver stimulant and energy source during recovery from stress, aflatoxicosis, or drug-induced hepatotoxicity. DL-Methionine and Biotin further support protein metabolism, liver enzyme activity, and tissue repair. Renobione-100 is ideal for use during or after antibiotic treatments, coccidiosis, toxin exposure, or any condition where hepatic function is compromised, making it a vital tool to restore appetite, improve digestion, and maintain peak productivity in poultry and livestock.

Indications

Indicated for the management of hepatic and biliary degeneration, restoring the structural and functional integrity of liver and gallbladder tissues in poultry and livestock.
Effectively supports the detoxification of the liver during toxic, infectious, or drug-induced insults, including mycotoxicosis, antibiotic overload, and environmental stressors.
Recommended for the treatment and prevention of hepatic lipidosis (fatty liver syndrome) by promoting lipotropic activity and enhancing fat metabolism through high levels of Choline, Inositol, and Methionine.
Aids in the recovery from viral and metabolic hepatitis, helping regenerate damaged hepatocytes and restore hepatic enzyme balance for improved systemic function.
Acts as a powerful post-antibiotic liver regenerator, assisting in the clearance of residual drugs and metabolites while revitalizing hepatic function.
Provides strong antioxidant and anti-stress action, reducing oxidative damage to liver cells during high-performance phases, infections, or heat stress, thanks to the synergistic action of Silymarin, Vitamin E, and C.
Functions as a performance enhancer, indirectly stimulating growth, feed intake, and egg production by improving liver efficiency, digestion, and nutrient assimilation.
Stimulates the secretion of digestive and pancreatic enzymes, thereby improving feed digestibility, nutrient absorption, and overall digestive function under high metabolic loads.

DOSAGE & ADMINISTRATIONS

Curative : 1 ml/4 lit of drinking water, for 5-7 days
Preventive : 1 ml/8 lit of drinking water.

Shake well before use.
Medicated drinking water should be used within 24 hours.

Composition

Silymarin ---- 4%
Vitamin E ---- 10,000 mg
Vitamin C ---- 10,000 mg
Biotin ---- 100 mg
Sorbitol ---- 200,000 mg
Inositol ---- 20,000 mg
Choline Chloride ---- 100,000 mg
DL-Methionine ---- 20,000 mg
Sodium Bicarbonate ---- 2,000 mg

Available SKU's

1 Liter Bottle (12 bottles per carton)
5 Liter Can (4 cans per carton)
